

Connecting Wisconsin, connecting people

Better roads. Better business.

The US 41 Project will provide many opportunities for success to those who live and work in Wisconsin. To ensure that all members of the community can participate in project opportunities, WisDOT has created a number of options for people to choose from.

The **41 Advisory Committee** oversees the business goals of the project. Made up of individuals from industry, government, Tribes, and labor, the Advisory Committee's goal is to guarantee that women, Tribes, and minorities will have equal opportunities throughout the construction project.

The **41 Business Subcommittee** unbundles projects to afford smaller companies the opportunity to bid on work that would otherwise be too large for them to complete. It also tracks Disadvantaged Business Enterprise usage on the project.

The **41 Labor Subcommittee** tracks labor usage and jobs on the project.

The **41 Tribal Subcommittee** is the first-of-its-kind on a WisDOT project in the state. It makes recommendations on how Native Americans can participate in the project as well as understand the impacts the US 41 Project has on their Tribal communities.

In addition, WisDOT has partnered with the Oneida Nation to create the **US 41 Project Outreach Office**. The office reaches out to disadvantaged communities and Tribes, specifically to provide a place for interested business and individuals to come and receive training that will improve the capacity of women, minorities, and Tribes to successfully participate in the US 41 Project.

US 41 Project labor outreach efforts

Opportunities for work

The US 41 Project Outreach Office will provide information on a wide range of work opportunities for disadvantaged contractors and sub-contractors in an assortment of areas, including:

- Construction administration: engineering, surveying and inspection
- Earthwork: roadway and drainage excavation, trucking and the removal of old structures
- Pavement: asphalt, concrete and base course
- Structures: bridges, noise walls, culverts, retaining walls, painting, demolition, piling and steel supplies
- Traffic control and safety: pavement marking, signing, beam guard, fence and electrical
- Landscaping: top soil, seed, mulch and plantings
- Public outreach: media, business and community

DBE outreach

A helping hand

Disadvantaged Business Enterprise outreach is an important part of the US 41 Project. DBE contractors and subcontractors will have the opportunity to share in the millions of dollars the project will bring to the Northeast Wisconsin region. WisDOT offers a variety of training and technical assistance to DBE firms through the US 41 Project Outreach Office. These include one-on-one technical assistance, free access to computer workstations and plan-reading rooms, and information on obtaining and maintaining DBE certification.

Who's involved in WisDOT outreach?

- DBE advisory committee
- Three sub-committees that help with business development
- Contractors, elected officials and WisDOT staff

Business outreach plan:

- Analyze potential for business involvement and growth
- Recommend DBE goals on US 41 projects
- Educate people about DBE benefits
- Business education and training

For more information on DBE qualification, [visit the WisDOT Web site](#) .
